

## **Press release 10**

Ladies and Gentlemen,

The Austrian Federal Government has introduced a bill in the National Council for the repeal of the compulsory vaccination law. The reason given by the Minister of Health is that it had not motivated anyone to get vaccinated, but that it had split society, even families.

In view of this, the FAIR Movement calls on the Luxembourg government to abandon all its plans for a compulsory vaccination law. This also in consideration of the numerous side effects that have become known and now also the German birth rate decline. According to available data for the first quarter<sup>1</sup> the series is:

2019: 182,138

2020: 184,643

2021: 187,543

2022: 164,614 live births.

The remarkable slump correlates with the rise in the vaccination curve among 18-59 year olds nine months earlier.

Moreover, any compulsion to adopt an experimental substance - and both mRNA and vector substances are - is a violation of Article 7 of the International Covenant on civil and political rights, adopted by the UN General Assembly on 19.12.1966, signed by Luxembourg on 26.11.1974 and ratified on 18.8.1983.

Article 7 states: "No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment. In particular, no one may be subjected to medical or scientific experiments without their voluntary consent."

The Board of the FAIR Movement
